Index to Communications of the ACM

VOLUME 11 • 1968

The Index is presented in three sections: I. Bibliography; II. Author Index; III. Department Index.

ENTRIES are included for technical papers, reports and articles that appear in the Contents listings of the twelve issues of the year, plus letters to the editor of technical content. An Index by Subject to Algorithms, 1960–1961, appears on page 527–530 of this issue.

THE REFERENCE NUMBER for each entry is a key to the year, volume, issue, and page number of the item.

THE AUTHOR INDEX gives authors' names listed singly. For papers by multiple authors, each authors' name appears in alphabetical order. Thus the fact that an author's name is followed by the title of an article does not mean that he is necessarily the only author of that article; he may be one of two or more authors.

IN THE DEPARTMENT INDEX the year's contents are arranged under the following headings: *Communications* technical departments; special reports; proceedings issues; and letters to the editor (of technical content only).
